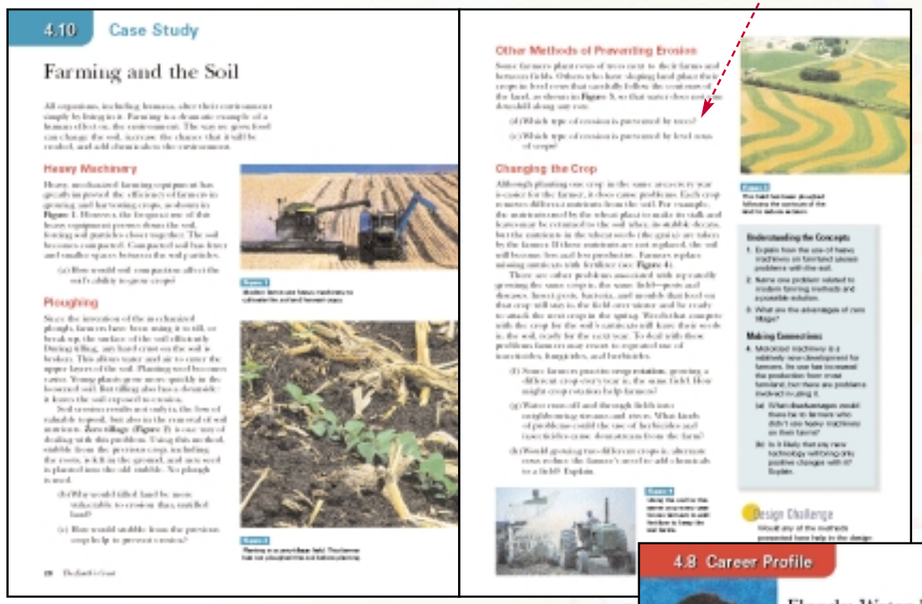
Case Study

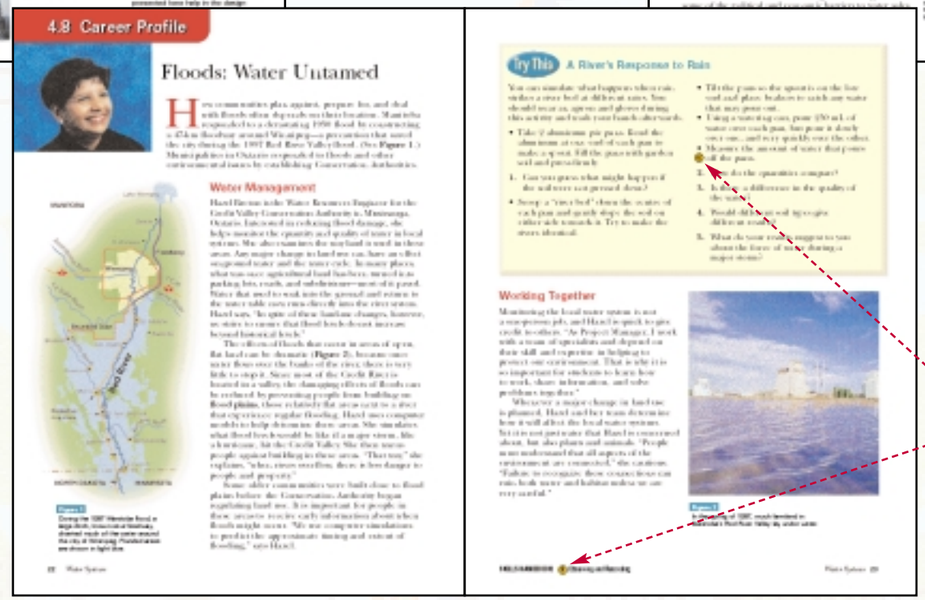
Case Studies introduce students to issues that, for reasons such as time, safety, or expense, they would not be able to investigate themselves. *Case Studies* also help to develop new concepts in context.

Questions
Key questions embedded in the narrative help students focus on and develop key ideas and information.



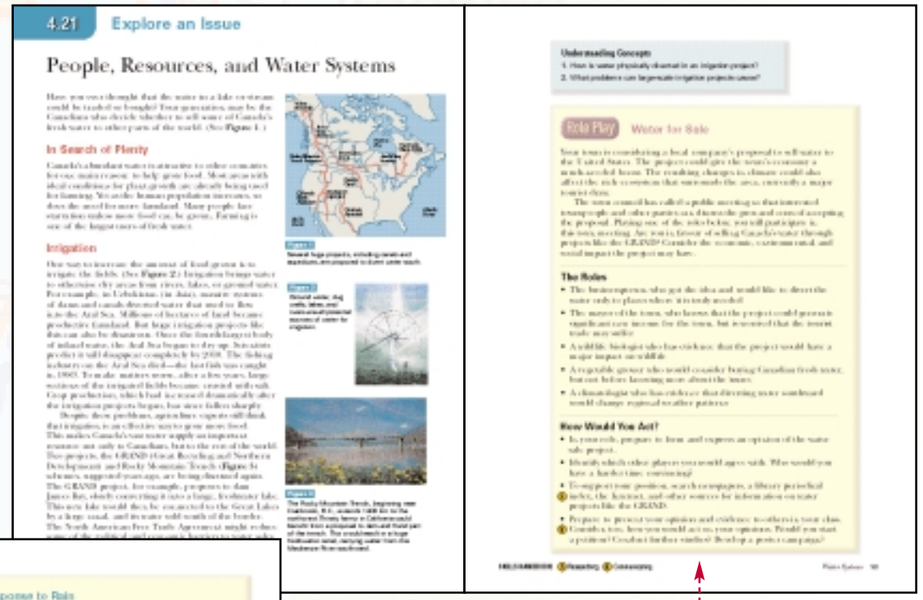
Career Profile

Each unit highlights the career of a Canadian currently employed in a science and technology field. This feature provides a real-world application of concepts and skills related to the unit.



Explore an Issue

Each unit has one *Explore an Issue* which allows students to synthesize their knowledge and skills by examining a "real-world" situation.



Role Play or Debate
Role play or debate situations provide students with an opportunity to analyze, synthesize and evaluate issues, and to examine them from another perspective or viewpoint.
