5	Lone parent family	75	75
7	Not applicable - no spouse/partner in household	195	195
		=====	=====
		1,000	1,000

Coverage: All respondents.

Source: General Social Survey household composition matrix.

Format: I1

Weight variable: WGHT_PER

Note: This variable was derived using the children listed on the household composition matrix only. In cases of multigenerational households where the respondent lived with a spouse or partner as well as a child and a grandchild, FAMTYPE was set to 1. In cases where the respondent had no children in the household and lived with only one parent, FAMTYPE was set to 5. An intact family refers to a now-married or common-law couple where all children (listed in the household composition matrix) have both biological parents in the household. A step family refers to a now-married or common-law couple in which at least one of the children (listed in the household composition matrix) is in a step relationship with one of the parents. The respondent might be a parent or a child aged 15 or older in the family.

Variable: **PRV** Position: 11 Length: 2

Province of residence of the respondent.
