

Chemistry 12

Specifically developed for the
Chemistry, Grade 12, University
Preparation (SCH4U) Curriculum

Authors

Lucille Davies
Donald Plumb

Hans van Kessel
Dr. Frank Jenkins

Program Goals

1 To ensure a thorough and comprehensible treatment of all content and process expectations in the SCH4U curriculum

- Complex chemistry concepts are presented in a clear, understandable fashion
- Important concepts, such as thermodynamics, are treated in greater depth than specified in the curriculum

2 To equip students with the independent learning, problem solving and research skills essential for success in post-secondary studies

- Self-contained and self-explanatory lessons
- A variety of self-evaluation and self-checking strategies
- A mature design similar to what students will experience with first year university/college texts
- The placement of lab activities at the end of chapters parallels the formal separation of theory and labs in university courses
- Extension and web link strategies provide opportunities to hone individual research and study skills

3 To acknowledge the science background and level of preparation of students entering this new course

- A wealth of diagnostic, pre-testing activities
- Regular practice, assessment, and remediation opportunities
- A chemistry appendix with a review of key Grade 11 concepts

4 To support busy teachers with the implementation and administration of this new curriculum

- Student lessons accommodate independent learning
- A comprehensive array of planning and assessment tools reduce lesson preparation time
- Access to a variety of different instructional approaches
