

# Helping Hands

Dear Parent/Guardian,

In your child's Social Studies class, we are studying Canadian communities. We are trying to find out about people whose actions have improved our community. This person might be you, or another family member, or someone you know.

Some examples of ways people help are

- cleaning up litter in the neighbourhood
- helping with an after-school program
- working on a committee to improve a public space
- helping with community projects.

If you know someone like this, we would appreciate it if you could talk to your child about the person and write some notes below. Thank you for your time.

1. Who has helped the community?

2. What did this person do?

3. How did this person's action help the community?
