

Contents

1. The Nature of Science and Technology

Science Is About Understanding Nature	4
Technology Is About Solving Problems	8
Science and Technology Work Together	10

2. Scientific Inquiry and Experiments

Thinking as a Scientist	12
Scientific Inquiry	12

3. Scientific Research

Ask Questions About the World Around You	22
Identify a Research Topic and Develop a Research Question	22
Identify Sources of Information	22
Evaluate the Sources of Information	23
Record and Organize the Information	23
Make a Conclusion	23
Evaluate Your Research	24
Communicate Your Conclusions	24
Using the Internet	24
Exploring an Issue Critically	25
Conducting Interviews and Surveys	28

4. Technological Problem Solving

Thinking Like a Technologist or Engineer	30
Performing Technological Problem Solving	31
Technical Drawings	36

5. Safety, Tools, and Equipment

Getting Off to a Safe Start	38
Safe Science and Technology	39
Working with Tools and Equipment	41
The Microscope	43
Using Other Scientific Equipment	44
Safety at Home	45

6. Using Mathematics in Science and Technology

Measurement and Measuring Tools	46
Solving Numerical Problems Using the GRASS Method	52
Significant Digits and Scientific Notation	53
Data Tables and Graphs	55

7. Study Skills for Science and Technology

Reading Strategies	59
Graphic Organizers	61
Working Together	68
Setting Goals for Yourself	70
Study Habits	71
Learning the Key Concepts	72

8. Presentations in Science and Technology

Written Presentations	74
Oral Presentations	76
Electronic Presentations	78

Glossary	79
