

Tests of Early Cognitive and Academic Development

A groundbreaking early childhood assessment tool from the team that brought you the Woodcock Johnson IV (WJ IV)

About the Woodcock Johnson IV Tests of Early Cognitive and Academic Development

The WJ IV tests of *Early Cognitive and Academic Development* (ECAD™) is specifically designed for children ages 3 years through 7 years and children with cognitive developmental delays through age 9 years. The 10-test battery measures general intellectual ability, early academic skills, and expressive language skills—all in a single test easel.

With its combination of **unique new material** and early-form content adapted from trusted WJ IV tests, ECAD™ provides a dynamic way for examiners to assess emerging cognitive abilities and academic skills in young children and children with cognitive delays using contemporary, theory-based measures.

All WJ IV assessments including the ECAD™ come with web-based scoring and reporting.

The 10-test ECAD™ battery includes:

- Memory for Names
- Sentence Repetition (Early Form)
- Sound Blending (Early Form)
- Rapid Picture Naming (Early Form)
- Picture Vocabulary (Early Form)
- Letter-Word Identification (Early Form)
- Verbal Analogies
- Number Sense
- Visual Closure
- Writing (Early Form)
